Hi, there! I am a self-taught iOS engineer that is looking for a junior iOS position. Currently, I am working on a simple Plant App that keeps track of water schedules with push notifications and cloud integration using Google Firebase to allow users to create their own account with their saved plants. I am excited for a possible opportunity to work with a team of like minded iOS engineers that are working towards the same goal. Coding for your own project is one thing, but to come in and code with a team that can assist in furthering my knowledge and work ethic is something I look forward to.

INDUSTRIES: Services

TECHNICAL SKILLS

• Swift	1 years & 2 months
• SQLite	1 years & 2 months
• Firebase	1 years & 2 months
• Realm	1 years & 2 months
• Core Data	1 years & 2 months

SOFT SKILLS

Teamwork, Critical thinking, Problem-solving, Communication, Time management

PROJECT DETAILS

• PlantApp_UIKit — December-2022 - February-2023

Project Description: Currently, I am working on a simple Plant App that keeps track of water schedules with push notifications and cloud integration using Google Firebase to allow users to create their own account with their saved plants. Currently, I have two versions of t

Responsibilities: ● Created UIs that dynamically adapt accordingly to Auto-Layout using both interface builder with Storyboards/XIBs and programmatically inside iOS VIew Controller Life Cycles in UIKit. ● Passed data between view controllers using either segues, delegates

Technologies: UIKit

Industry: Services

• PlantApp_SwiftUI — November-2022 - February-2023

Project Description: A Plant App that keeps track of water schedules built using SwiftUI. Most features/functions are currently being worked on the UIKit version. Once features are completed, I will implement them to the SwiftUI side.

Responsibilities: ● Created UIs easily with less code and a declarative syntax using Apple’s SwiftUI’s framework. Embedded custom individual views nested in VStacks/HStacks/Groups within a NavigationView. ● Utilized Apple’s CoreLocation framework to grab user’s current lo
