• MVVM	4 years & 5 months
• Xcode	4 years & 5 months
• Swift	4 years & 5 months
• VIPER	2 years & 6 months
• Github	2 years & 6 months
• Jira	2 years & 6 months
• Figma	2 years & 6 months

PROJECT DETAILS

• Laboga — November-2019 - July-2020

Project Description: A shopping app which contains clothes and user's can buy those. App has 2 types of clothes Abayas, Dresses user's can select the type and quantity and can add to cart and but them by giving their delivery address. It also has desingners who sell the designer clothes. Designers can their products using designer app. While buying Products, user has option to give their measurements, according to that measurements sellers should make the clothes and delivery them.
Responsibilities: Developed the complete app from scratch using Xcode and Swift programming language. Designed the screens and integrated the APIs. As it is agile development I took new requirements and developed them as well .
Technologies: iOS, Xcode, Swift, RESTful APIs
Industry: Ecommerce

• Sportien — August-2021 - December-2022

Project Description: It's a sports related application which has 3 types of logins Player, Coach, Manager and also has clubs. Players and Coaches join into clubs which will be managed by Manager. Coaches and managers can schedule the practice, fitness sessions and players will perform in that. Players can also add their matches and all the sessions and matched data will be tracked and used to calculate the performance of that player.
Responsibilities: Developed the app from scratch. Designed the screens, integrated the APIs, tracking the progress in JIRA and delivered the work as per sprint and fixed the bugs reported by client.
Technologies: iOS, Xcode, Swift, APIs
Industry: Sports and Gaming
