With 8 years of experience developing and launching successful mobile applications for iOS devices, I am a highly skilled and motivated iOS developer who is proficient in Objective-C, Swift, Xcode, iOS SDK, Cocoa Touch, and other programming languages and tools. As a Senior iOS Engineer with extensive experience in Backend development, UI design, API integration, and Architecture, I am dedicated to crafting exceptional iOS applications with a resilient and problem-solving mindset. I am passionate about creating elegant solutions to complex problems, and I thrive in fast-paced environments. I have a proven track record of meeting tight deadlines while delivering high-quality work. With excellent communication skills and the ability to work independently or collaboratively, I specialize in developing scalable and robust iOS applications that exceed user expectations

INDUSTRIES: Automobile, Software and Platforms

TECHNICAL SKILLS

• Xcode	8 years
• iOS	8 years
• Swift	6 years
• Unit Testing	4 years
• MVVM	4 years
• ObjectiveC	2 years
• SwiftUI	1 years

PROJECT DETAILS

• STouch — December-2018 - September-2021

Project Description: The STouch is a mobile application used by salesmen at authorized car dealerships in selected countries. Main purpose of the application is to help the salesperson with relevant information and systems necessary to complete a sales process. STouch can also be used for capturing customer information; configuring a car, obtaining equipment list, viewing images; brochures or videos, finance calculator, test drive booking etc.
Responsibilities: Create detailed design artifacts, work on development and perform code reviews, implement validation and support activities in line with architecture requirements. Worked with the QA team to identify and resolve bugs and ensure application stability
Technologies: iOS, Swift, Xcode IDE, Restful Web Services, Cocoa Pods, Agile Scrum, Git, Jira
Industry: Automobile

• Sign App — September-2021 - March-2023

Project Description: Sign app lets you e-sign documents and forms, send them to others for e-signature, track responses in real time and get signatures instantly with in-person signing. It even lets you work offline and syncs automatically when you are back online
Responsibilities: Designing and building mobile applications for Apple iOS platform Collaborating with the design team to define app features Ensuring quality and performance of the application to specifications Identifying potential problems and resolving application bottlenecks Fixing application bugs before the final release Publishing application on App Store
Technologies: iOS, Swift, Xcode IDE, Restful Web Services, Cocoa Pods, Agile Scrum, Git, Jira
Industry: Software and Platforms

EMPLOYMENT HISTORY

• Application Development Senior Analyst September-2021 - April-2023

Description: Designing and building mobile applications for Apple iOS platform, Collaborating with the design team to define app features, Ensuring quality and performance of the application to specifications, Identifying potential problems and resolving application bottlenecks, Fixing application bugs before the final release Publishing application on App Store

• Technology Analyst December-2018 - September-2021

Infosys Limited

Description: Create detailed design artifacts, work on development and perform code reviews, implement validation and support activities in line with architecture requirements.

• Software Engineer December-2016 - November-2018

Sparksupport Infotech Pvt ltd

Description: Understanding & mapping client's requirements / enhancements to the product,: implementing solutions that effectively resolve problems or provide Improvement, Coordinating with team members for system design, integration, application maintenance, etc, Researched in order to identify upcoming trends

• Associate Software Engineer October-2014 - December-2016

Digital Mesh Softech India P Limited

Description: Design and build applications for the iOS, Android platforms. Coordinating with team members for system design, integration, application maintenance, etc. Unit-test code for robustness, including edge cases, usability, and general reliability

EDUCATION

• Bachelors degree in Computer Science and Engineering from MG University 2010 - 2014

LANGUAGES

• English - advanced
